

Education Standards in School Informatics in Austria

Christian Dorninger
ISSEP Klagenfurt, 30.3.05

DAS ZUKUNFTSMINISTERIUM

bm:bwk

Education standards in IT

Agenda

- e-learning approaches
- eFit – Austria project
- Education standards
- Informatics in VET-Systems
- Model of IT standards
- First experiences

March 05

Learning in digital age

- ◁ “e-learning” one of the important EU-topics
- ◁ IT infrastructure is a fact – no more discussion
- ◁ Media-centers vs. school development
- ◁ Outsourcing vs. competence centers
- ◁ Private-public partnerships will work
- ◁ Objectives, coaching, evaluation
- ◁ Partnership challenge in Europe (eTwinning)
- ◁ **PC, PDAs.. as tools for individual learning**

March 05

Blended Learning

March 05

eLearning – approaches cedefop, 2004

Virtual classroom	Learning environment with use of internet; “remote learning”-quality
Blended learning	Synergy of classroom learning and online training; labs, networks
Collaborat. Learning	Group work with e- learning tools platforms; collaborative process
Supported self-learn	Resources and tutoring, coaching

March 05

elearning with e-Fit Austria 2001-05

e-Learning	Learning with Computer / Internet - nonlinear, mediabased, networking
E-Learning platforms	evaluation of learning – platforms and contentmanagement systems www.virtual-learning.at
Community & Services	e-blackboards; newsgroups; virtual classrooms; online - courses
Content creation	Content - pool -> quality assurance -> content - repository

March 05

Education standards

March 05

Education standards ↔ enhanced learning

- Content based learning:**
- Knowledge
 - Understanding
 - Application
 - Analysis
 - Synthesis
 - Meaning

- Method based learning:**
- Heuristic Strategies
 - Information collecting
 - Information structuring
 - Planing
 - Figures and structures
 - Presentation

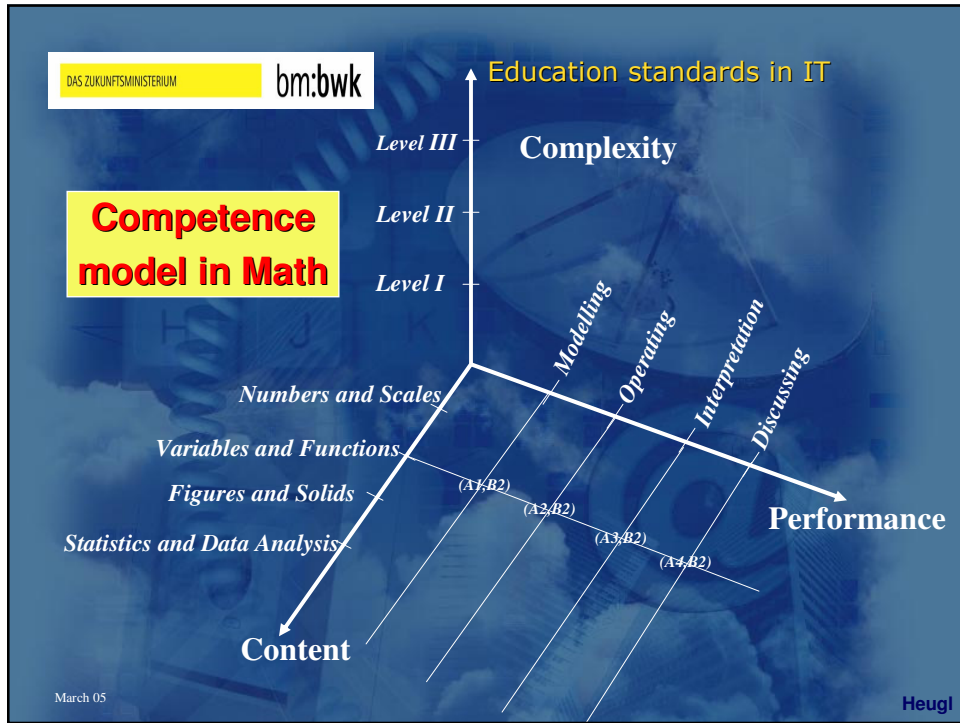

- Social-communicative learning:**
- Listening
 - Discussing
 - Argumentation
 - Cooperation
 - Leading
 - Integrating
 - Support

- Personality learning:**
- Selfconfidence
 - Personal Values
 - Engagement
 - Developing interests

➔ **Math and Informatics with intersubjective competences**

March 05

Heugl

DAS ZUKUNFTSMINISTERIUM **bm:bwk** Education standards in IT

Formulating Education standards

A	B
General math/Informatic competences	Content oriented math-competences
<p>A4: Arguments und Proving</p> <p>A4.1 Proving a decision for a specific solution</p> <p>A4.2 Proving a falsification</p> <p>A4.3 Presume a solution by trial and error and prove it.</p>	<p>B1: Working with numbers and scales</p> <p>B1.1 Coordinate different numbers to different number areas.</p> <p>B1.6 Skills in percentage calculation.</p> <p>B1.8 Working with scales.</p>

March 05 Heugl

Formulation of tasks on different levels

Students might develop various formulas to express this relationship on the basis of a table or their reasoning about the situation; for example, "You need $L + 2$ tiles across the top and the same number across the bottom. And you need W tiles on the left and the right. So all together, the number of tiles needed is ?

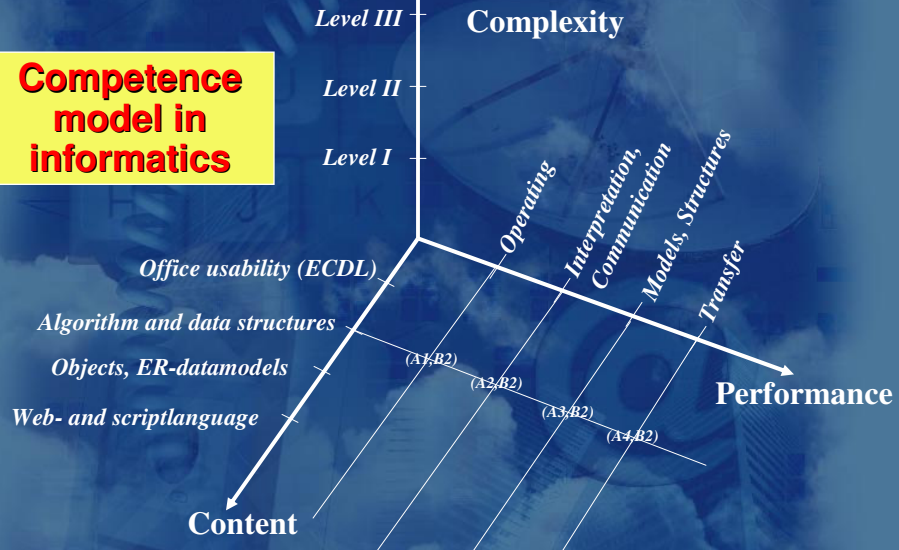

Solution: $T = 2(L + 2) + 2W$

March 05

Heugl

Competence model in informatics

March 05

IT- standards ↔ levels of competence

Level 1: ECDL-Office

- OS (MS/Open S.)
- Textprocessing
- Spreadsheets
- Databases
- Presentation
- Internet-Communication

Level 2: Programming

- Programming styles
- Data structures
- Algorithm
- Data models
- Modularisation (Procedures, functions)
- Files, Pointers, Objects

Level 3: IT-expertise

- Certification in Networks, Net-OS, Database, ERP, Webtechnologies, LMS-plattformen (?)

Level 4: Science (at Uni)

- Systematic approach,
- Research
- Developing new software (concepts)

Different approach to the four levels

March 05

Experiences since 2000

1. Economy of scale: 100.000 ECDL, 3500 IT-certificates, 2000 ECDL-Advanced,....

2. Transitions from level 1 to level 2 – form office to programming is crucial point:

“Visual Basic for Application has all possibilities, to adapt packed standard software to individual needs- the possibility of adapting standard software is an important message.

VBA-environment has good usability, editor, contexthelp, debugger and tracer .. “

Prof. E.Neuwirth, 24.5.93

March 05

A nice transition....

Makrorecorder in Excel (Extras/Macro recording..)

EXCEL-Programm recorded (small table..)

Test of macro (name or shortcut..)

Correcting macro (cancel redundant code)

Improving logical mistakes ("recording from position..x...")

Substanzbeitrag

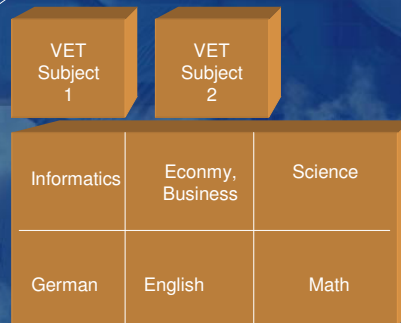

Amplitude

Zeile	Werte	Streu	Streu
0	0	0	0
1	0,3496585	0,00291332	-0,00291332
2	0,698117	0,00477962	-0,00477962
3	1,0471755	0,0077728	-0,0077728

18	6,2741531	-2,08738-18	2,08738-18

March 05

VET – Subject groups

Levels

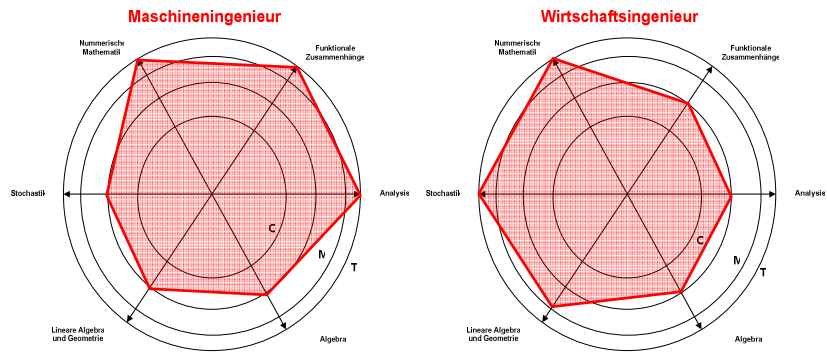

BBS/VET - specific

BBS/VET- general

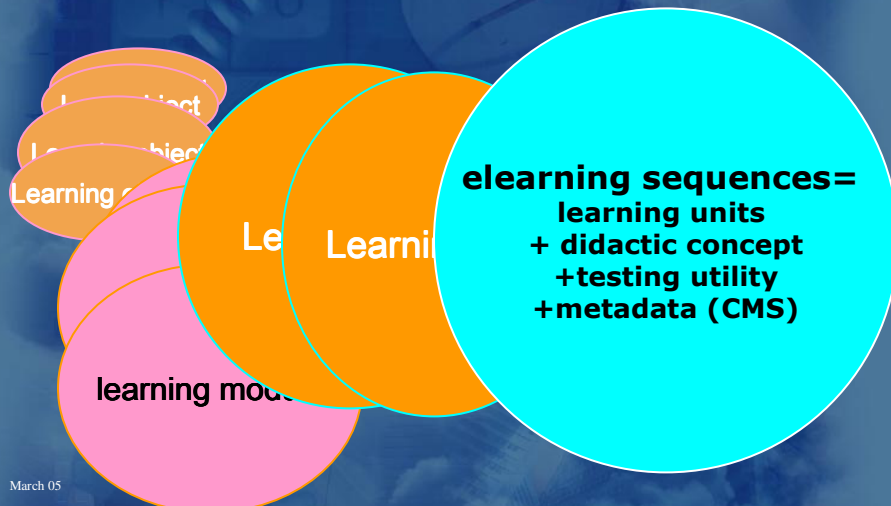

General (with AHS)

March 05

Visualisation of competence models mechanical engineering

Standards and e-learning

eLearning- sequences

1. Lasting 3-4 weeks of teaching/learning
2. Metadata: Klassifikation after
 - a. Portals of subjects:

Subjects in primary schools; German; Languages; History; Geography; Philosophy und Psychology; Mathematics; Science (inklusive Medicine); Economy and Law; Sports; Arts und Creativity; Business and Accounting; Informatica und Office-management; Techology education; Others.
 - b. Levels of Education :

Elementary education (Volks- und Sonderschulen), Secondary education I (Hauptschule, AHS-Unterstufe, u. a.), Secondary education II (Vocational Education and training included), Post Secondary Education (Academies, Colleges or postsecondary courses)

March 05

2. Information for Teachers

Methods and didactic references, solutions of tasks, experiences and variation, modularity, teacheractivities and interventions, learning organisation.

 - a. Targets of teaching and learning
 - b. Target groups, pre-knowledge of students needed
 - c. Syllabus, work plan
3. Learning units structured in
 - a. Beginning
 - b. Material for theory phases/ Material of application phases
4. Tasks and exercises
5. Assessment

March 05

Education standards in IT

elearning-objects and tasks

Tasks and examples of standards and

e-learning objects

(f. i. worksheet, sketch with explanation, collection of links)

in a media format like **weblecture**,

interactive test, **simulation**,

webquest or others

must be combined in one concept.

Learning object (London LTRI):

www.londonmet.ac.uk/ltri/learningobjects/index.htm

vgl. Erlass: Elektronischer Content für Österreichs Schulen GZ 629/1-III/03 vom 22. August 2003

March 05

Highlights of e-learning projects in Austria

Christian Dorninger
ISSEP Klagenfurt, 30.3.05

What is an e-learning school (e-education)

Every student (upper secondary) can test e-learning sequences in the next to years

All teachers should get experience with e-learning sequences in their subjects

Teams of teachers work on e-learning programmes (didactics, methods, content)

Good school experience in **regional networks**

Steering group of school partners must be established to support content development

Cluster schools are working in networks and offer **additional qualifications** (IT-certificates)

School development – House of learning

Only concrete pedagogical visions can bring about a fundamental change process, e.g.:

◀ e-Education (“e-learning-school”)

◀ Bilinguality (two languages at school for all)

School programme, change management

50% of syllabus made by school community

Global budgeting, specific learning assignments

E-learning school clusters

Pick the winners and let them work together:

- ◁ About 50 schools in all Austrian provinces
- ◁ Exchange experience in different types
- ◁ Cooperation with unis and companies
- ◁ Reinvent “old” pedagogical concepts (Daltonplan, training firms, industry project)
- ◁ Regional clusters with local coordination

March 05

Knowledge management at school

Knowledge maps

Knowledge-mapping can make know-how of people in any context visible.

Knowledge support	Knowledge-Item	Knowledge-Item 1	Knowledge-Item2	
Person 1				
Person 2				
Person 3				

March 05

eContent Initiative tasks

- ▶ Providing content for all subjects
- ▶ Providing content for specific topics
- ▶ Needs for notebookPC classes
- ▶ Pathways of learning, worksheets
- ▶ Simulations and games
- ▶ Webquests,...
- ▶ Examinations and tests
- ▶ Copyright regulations !

March 05

March 05

SbX as part of e-Content

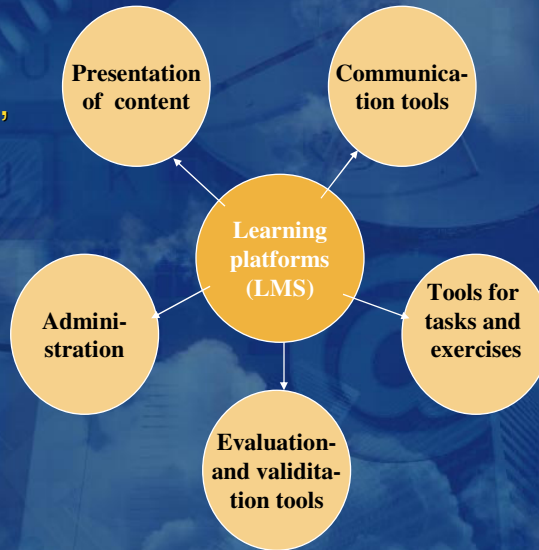

- ◁ SbX = School book eXtra: Webextension of normal school book in the internet
- ◁ PP-Partnership schoolbook publishers ↔ education administration
- ◁ Free access: www.sbx.at / sbx.bildung.at
- ◁ **About 100 titles in a year 2003-2006**
- ◁ Used quite differently at schools
- ◁ SbX must be evaluated

March 05

March 05

Platforms (LMS, CMS, LCMS) oder individual learning tools (Mindmapping)

LMS:

Tools

- Chat
- Messaging
- Notes
- Discussion Forums
- Progress Tracking
- Search
- Multilinguality
- Library, Glossary
- Statistics Reports
- ...

Rooms

- Studyroom
- Courseroom
- Café
- Administration
- Foyer

Roles

- Trainees (->Profiles)
- Trainers & Tutors
- Authors
- Administrators

School homepage Award

2500 Schoolhomepage in Austria

Criteria for good homepages:

- ✓ School profile (design,)
- ✓ Events, datebook, supplierung (?)
- ✓ E-Mail-Address for all teachers/students
- ✓ Chronicle
- ✓ Virtual classrooms

Quality Awards for Schulhomepages

March 05

IT - Competitions

- ◁ **Jugendinformatik**-Wettbewerb der OCG – 3 categories according to grade 4, 8 and 12 – programming, websites, projects
- ◁ Internetwettbewerb **Cyberschool** -4 categories junior, classic, technics, Girls only; webpage-design, games, e-learning
- ◁ **L@rnie-Award** 2004 eContent competitions for teachers and teacher-student teams, 6 categories

March 05

Studies of learning in notebook-classes

- ▷ High satisfaction of students with e-learning environment
- ▷ High teacher agreement and abilities
- ▷ NotebookPC-class students are better in organisation of learning
- ▷ Students are better problem solvers and text-editors
- ▷ Negative consequences (lack of concentration, internet addicts, worse grades) could not be found

March 05

Output results of notebook-studies

Competences of NotebookPC- students

- ✓ information management is good
- ✓ teamwork is sometimes better
- self-organisation is significantly better
- motivation is significantly better

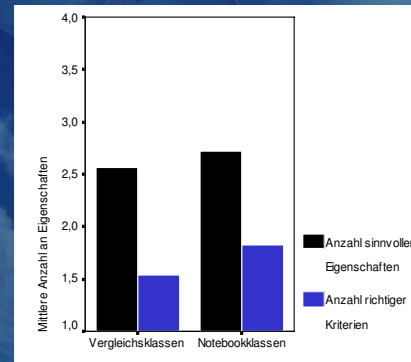

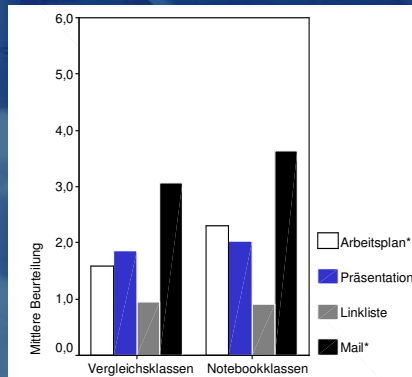

Side effects and risks:

- low concentration on subject area learning – proved false
- PCs/Internet addiction - proved false
- low achievement in other subjects – proved false

March 05

Information management and teamwork of students

March 05

Critical Success factors

- 1) e-learning school clusters (structure with selforganisation and benchmarking)

<http://www.schule.at/elc-community>

<http://e-lisa.at/notebook-klassen>

- 2) Content(server) with material (critical mass)

“Schulbuchextra”: <http://sbx.bildung.at>

“Mathe-online”: <http://www.mathe-online.at>

March 05

Entrance to lifelong learning

- ▷ e-learning approaches are a vehicle to use permanent classroom external information resources
- ▷ e-learning empowers students to communicate with (often anonymous) experts worldwide
- ▷ e-learning skills certified as in business and industry
- ▷ e-learning allows individual learning pathways
- ▷ e-learning supports own learning environments

-> therefore it supports lifelong learning
