

Why is Knowledge-Management so important in schools?

How is the situation of teachers at school?

Each teacher is a „Multitask-Projectmanager“ with specially hard conditions:

- temporal carving of all single projects
- no existing structures for cooperation between teachers
- too little budget
- no training in methods of project management
- bad social acceptance

How can eKnowledge-Management serve to improve the daily work at school?

The eKnowledge-Platform as a technical coffee-room

The image is a screenshot of a web browser displaying the SCHOOGLE.AT platform. The browser's address bar shows the path: 'SCHOOLS Go eLearning > BORG Spittal/Drau > Lehrer > Fachgruppen > Geographie'. The page header includes the logo 'SCHOOGLE.AT schools go eLearning' and the user name 'Benutzer: Kern Arnold'. A navigation bar contains links for 'Mein Home', 'Abmelden', 'Bearbeiten', and 'Einstellungen'. A left-hand navigation menu is expanded to show 'Geographie', which includes sub-items like 'Kalender', 'Maßnahmen', 'Mitglieder', and 'Team-Ordner'. The main content area displays the 'Geographie' workspace with a globe icon and a list of tools: 'Kalender' (calendar icon), 'Maßnahmen' (checklist icon), 'Mitglieder' (people icon), and 'Team-Ordner' (document icon). Each tool has a brief description. At the bottom of the workspace, it states 'Besitzer: hjugovits • Erstellt: 17/02/2005 12:36:34'.

Absolutly necessary conditions for a eKnowlege-Platform at school

- The platform must reflect the organizational structure of the school
- The creation of a new culture of communication and cooperation at school
- Simple and user friendly handling
- Outsourcing of the technical servicing

The screenshot shows a web application interface for 'SCHOOls Go eLEarning'. The top navigation bar includes 'Mein Home', 'Abmelden', 'Bearbeiten', 'Einstellungen', and a help icon. A sidebar menu on the left lists various sections: 'BORG Spittal/Drau', 'Homepage', 'Kontakt', 'Lehrer' (with sub-items: 'Allgemeine Themen', 'Fachgruppen', 'Persoenliche Ordner', 'Termine'), 'Projekte', and 'Schüler'. The main content area is titled 'Schüler' and contains a table with columns 'Typ' and 'Titel'. The table lists three items: 'Arbeitsbereich' (Ablage für Schülerarbeiten), 'Diskussionsforum' (Alle Schüler sind eingeladen, hier ihre Themen und Ideen zu diskutieren), and 'Userhomes' (Persönliche Seiten der Schüler). At the bottom, it shows 'Besitzer: hwsystem • Zuletzt geändert am: 1'.

Typ	Titel
📁	Arbeitsbereich Ablage für Schülerarbeiten
💬	Diskussionsforum Alle Schüler sind eingeladen, hier ihre Themen und Ideen zu diskutieren
👤	Userhomes Persönliche Seiten der Schüler
